## B:E-VII Sem - Biotech

Pharmaceutical Technology/11/CBG S/BT/PT.

(24) QP Code: 5966

. 10M

(3 Hours)

[Total marks: 80

N.B: Q1 is compulsory

Answer any three out of remaining five questions

Draw neat and labeled diagram wherever necessary.

|   | Draw hear and labeled diagram wherever necessary.  |            |
|---|--|------------|
|   | Q1]a) Desribe drug tolerance and bioavailability of drug with respect to drug dosing.      | 05M        |
|   | b) Describe Proteins as drug targets   | 05M        |
|   | c) Classification of drugs   | 05M        |
|   | d) Write short note on HIV antiviral therapy   | <b>65M</b> |
|   | Q2]a) Describe antiviral drugs used against RNA viruses                                    | 10M        |
|   | b) Describe the production of Cytokines as biopharmaceutical agents                        | 10M        |
|   | Q3]a) Describe the strategies involved in production of therapeutic proteins               | 10M        |
| • | b) Explain in detail about different drug targets.   | 10M        |
|   | Q4]a) What are the different modes of drug administration?                                 | 10M        |
|   | b) Describe anticancer drugs used as Antimetabolites                                       | 10M        |
|   | Q5]a) Describe the production of Hormones and Cytokines as biopharmaceutical agents        | 10M        |
|   | b) Describe antibacterial agents inhibiting cell wall synthesis                            | 10M        |
|   | Q.V  | nment      |
|   | 6]a) Write a note on Patenting and regulatory affairs related to drug discovery and develo | 10M        |
|   |  |            |

MD-Con. 9987-15.

b) Explain the role of nucleic acids as drug targets.
