B. G. Sem-VII - CBSGS - Stechnical
Paper / Subject Code: 42205 / Elective I :- 1) High Voltage Engineering

	(3 Hours)	(Total Marks: ou
N.B. :		
(1)	Question no: 1 is Compulsory.	
(2)	Solve any three questions out of remaining.	
(3)	Assume suitable data if required and Specify the same.	
0.1 4 = 0.11	on the following:	20
	er the following:- Discuss various factors which affect breakdown of gases.	
a)		
b)		
c)		
d)	Explain the resonant transformer in detail.	
	co : Co single stage impulse general	tor. 10
Q.2 a) Deri	ve an expression for voltage efficiency of a single stage impulse general	10
b) Disco	uss various method of measuring high dc and ac current.	
	1: Landsin Sleetric breakdown in vacuum	. 10
Q.3 a) Expl	ain clearly various process which explain electric breakdown in vacuum	$5.5 \times 10^* A$
b) In an	experiment in a certain gas it was found that the steady state current is	ld constant
at 8 l	KV at a distance of 0.4cm between the plane electrodes. Keeping the fie	
and re	ducing the distance to 0.1cm results in a current of 5.5x10*A,	10
Calcul	late Townsends's Primary Ionization coefficient.	
		10
Q.4a) Explai	in various test to be carried out on bushing. In clearly the procedure for measurement of 1, Impulse 2, ac high voltage	es
		10
using s	sphere gap.	
	ibe construction, principle and application of a multistage Marx's genera	itor. 10
Q.5 a) Descr	ripple voltage. Show that the ripple voltage in a rectifier circuit depends	on load
		10
current a	and the circuit parameter.	
O C - V Dilmita	short note on:- H V Laboratory Layout , grounding and Shielding.	10
2.6 a) Write	e and explain the following key terms in non-destructive testing technique	ies? 10
1)	Discharge detectors	
2)	Loss factor	
3)	D.C. Resistivity	
4)	Bridge techniques	
5)	P.D. Measurements.	
The state of the s
