		b) A test on two similar coupled series motors, with their field connected in series, gave			
		the following results when one machine acted as motor and the other as generator.			
		Motor: Armature current = $56A$, Armature voltage = $590V$, Field Voltage drop = $40V$			
	Generator: Armature current = 44A, Armature voltage = 400V, Field voltage drop =				
	40V. Resistance of armature is 0.3 ohms.
