## Paper / Subject Code: 31705 / Elective - I Piping Engineering

|           | Duration 03 Hr   | Marks   |
|-----------|--|---------|
| N.B.      | 1) Question No.1 is compulsory.  |         |
|           | 2) Answer any three out of five question.  |         |
|           | 3) Assume suitable data wherever necessary and state them clearly.                     | 3       |
|           | 4) Figure to the right indicate full marks.  |         |
|           |  | XXX 6   |
| Q.1       |  | 9 9 7 V |
| a)        | Explain water hammer in pipeline.  | 05      |
| b)        |  | 05      |
| c)        |  | 05      |
| d)        |  | 05      |
| /         |  |         |
| Q.2a)     | Explain various types of expansion joint with suitable neat diagram                    | 10      |
| b)        |  | 10      |
| ,         |  | 200     |
| Q.3a)     | Explain with figure IRON –CARBIDE phase diagram.                                       | 10      |
| b)        |  | 10      |
| - /       | calculated?  |         |
|           |  |         |
| Q.4a)     | Discuss the important factors in the selection of material of construction of pipes.   | 10      |
| ~ /       | Explain with examples.   |         |
| b)        | Name various types of valves with their application .Explain with neat diagram the     | 10      |
|           | construction, working and application of Globe valve.                                  |         |
|           |  |         |
| Q5 a)     | A crude oil of kinematic viscosity 0.4 stoke is flowing through a pipe of diameter     | 10      |
|           | 300 mm at a rate of 300 litres/sec. Find the head lost due to friction for a length of |         |
|           | 50 m of the pipe.  |         |
|           | A 8"NB Carbon steel pipeline is used to convey steam at a design pressure of 22        | 10      |
|           | kg/cm2(g). Determine the minimum thickness of pipe needed for the system based         | 10      |
|           | on the following:—   |         |
|           | Allowable Stress = 1500 kg/cm2   |         |
|           | Outer diameter = 219 mm  |         |
|           | Corrosion Allowance = 15 mm  |         |
|           | Weld factor = 0.4  |         |
|           | Allowable tolerance = 12.5%  |         |
|           | Joint efficiency = 0.90  |         |
|           | John Chicking – 0,50   |         |
| Q6 a)     | Explain Non Destructive Test for finding out defects in welding.                       | 10      |
| 5 5 7 VOX |  | 10      |
| b)        | i) Plot Plan   | 10      |
|           |  |         |
|           |  |         |
|           | iii) Insulation and Paining in pipeline  |         |
| 1 A. 1    | 10:00:400.00 00:00   |         |
