1T00536 - T.E.(Chemical Engineering)(SEM-VI)(Choice Base Credit Grading System) (R-2020-21) ('C' Scheme) / 89245 - II: Engineering Stream: Piping Engineering (DLOC)

University of Mumbai

**Program: Chemical Engineering** 

Curriculum Scheme: R- 2019 ('C' Scheme) Examination: T.E. Semester: VI

Course Code: CHDO6021

Course Name: Piping Engineering (DLOC)

Time: 2:30 hour DATE: 31/5/2022 QP CODE:93727 Max. Marks: 80

Q1.	Choose the correct option for following questions. All the Questions are compulsory and carry equal marks
1.	Which valve is used when a straight line of fluid and minimum restriction is required?
Option A:	Gate valve
Option B:	Lift check valve
Option C:	Butterfly valve
Option D:	Plug valve
	42 4 4 6 8 8 4 8 8 8 8 8 8 8 8 8 8 8 8 8 8
2	What is the ASME Code followed for design of Piping Systems in process piping (Refineries & Chemical Industries)?
Option A:	B 31.1 5 5 7 7 7 7 7 7 7 7 7 7 7 7 7 7 7 7 7
Option B:	B 31.3
Option C:	B 31,5 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8
Option D:	B 31.9
	82440748897800443
3.	Minor losses do not make any serious effect in
Option A:	Short pipes
Option B:	Long pipes
Option C:	Both the short as well as long pipes
Option D:	Cannot say
3/200	
R 2 47 7 2	P&ID stands for?
Option A:	Process & Information diagram
Option B:	Process & Instrumentation diagram
Option C:	Piping & Information drawings
Option D:	Piping & Instrumentation diagram
JAKOVA	
0305	In design process, which process is followed after selecting the material?
Option A:	Selecting factor of safety
Option B:	Synthesis
Option C:	Analysis of forces
Option D:	Determining mode of failure
12 8 2 8 B	
6.	How to calculate schedule no
Option A:	1000*P/S
Option B:	P*S/1000
Option C:	S*1000/P

Option D:	1000/P*S
- <b>F</b>	
7.	What is the function of valves?
Option A:	Isolation
Option B:	Regulation
Option C:	Non Return
Option D:	All of above
	\$\$\\ \alpha\\ \alpha\
8.	From which size onwards NB of pipe equal to OD of pipe?
Option A:	14 inch
Option B:	6 Inch
Option C:	4 Inch
Option D:	8 Inch
9.	In process tag XX-YZZ A/B, XX is
Option A:	Instrument classification
Option B:	Equipment classification
Option C:	Valve classification
Option D:	Pipe classification
10.	Which among the following is not a type of Non-destructive testing?
Option A:	Compression test
Option B:	Visual testing
Option C:	Ultrasonic testing
Option D:	Eddy current testing
	TOOLS OF TWO OF THE STATE OF TH

Q2.	Solve any Two Questions out of Three	10 marks each
(20 Marks)	18 8 8 8 8 8 8 8 4 8 6 V 4 8 8 8 9 8 8 9 8 8 8 8 8 8 8 8 8 8 8 8	
A	Explain with figure IRON -CARBIDE phase diagram.	
B	Name various types of valves with their app types). Explain with neat diagram the construction, Globe Valve.	` *
	What is NDT? Explain any four methods .Write applications.	e down its advantages and

Q3 (20 Marks)	Solve any Four out of Six 5 marks each
SAA	Explain the responsibilities of piping engineer
B S S	Classify the piping materials and describe them.
5 2 C 2 C	Explain the manufacturing process each of seamless and welded pipe.
\$ 10 D \$ 20 1	Write short notes on ASME B 31.3
E	What are different methods of protecting above ground and underground Piping from corrosion?
	How to minimize Head Losses in pipe? Explain in detail

Q4.	Solve any Two Questions out of Three 10 marks each
(20 Marks)	
	For Miter bend following data are given .Explain pipe thickness is sufficient for miter bend
	Outer diameter of Pipe = 800 mm
	Design temperature = $100  {}^{\circ}\text{C}$
	Allowable Stress $S = 950 \text{Kg/cm}^2$
A	Internal design Pressure P = 14.5 Kg/cm <sup>2</sup>
	Joint Efficiency $E = 0.8$
	Weld Factor $Y = 0.4$
	Corrosion allowance $C = 1.6 \text{ mm}$
	Mill tolerance = 12.5%
	Angle of Miter Cut $\varphi = 22.5$
	Effective radius of Miter Bend R = 800 mm
В	Discuss the important factors in the selection of material of construction of pipes.
	Explain with examples.
	Determine the thickness of CI pipe to carry 30 m <sup>3</sup> /min of compressed air at a
С	pressure of 0.7 N/mm <sup>2</sup> . The velocity of the air in pipe is limited to 8 m/s. Assume
	permissible tensile stress of a pipe as 15 N/mm <sup>2</sup> .
