Paper / Subject Code: 89301 / Power System Protection & Switchgear

1T00836 - T.E.(Electrical Engineering)(SEM-VI)(Choice Base Credit Grading System) (R- 19) ('C' Scheme) / 89301 - Power System Protection & Switchgear

QP CODE: 10041509 **Duration – 3 Hours**

DATE: 11/12/2023 **Total Marks** – **80**

N.B.:- (1) Question No.1 is compulsory.

- (2) **Attempt** any **three** questions out of remaining **five** questions.
- (3) Assume suitable data if necessary and justify the same.
- **Q 1.** Answer the following questions.

20

- a) Explain the role of protective relaying in the power system.
- b) Explain the difficulties in current differential protection.
- c) Explain the working of the under frequency relay.
- d) Explain high resistance arc interruption method..
- Q 2. a) Explain the construction, working principle and operation of 10 Vacuum circuit breaker.
 - b) Differentiate between static and electromagnetic relay.

10

- Q 3. a) Explain the construction and working principle of SF_6 circuit 10 breaker with neat sketch.
 - b) Draw and explain single line diagram of a typical substation and 10 indicate the location of different switchgear and protecting devices.
- Q 4. a) Describe the differential protective scheme for star delta 10 connected transformer.
 - b) Describe the protective schemes employed for the protection 10 against overload and winding temperature of induction motor.
- **Q 5.** a) Describe the bus zone protection in detail.

10

- b) Explain the types of protective schemes employed for the 10 protection of transmission line.
- Q 6. Write a note on Any Two

10*2

- a) Numerical Relay
- b) Bus bar Protection
- c) Phase comparison carrier current protection.
