(21/2 Hours)

[Total Marks: 75]

| N. | B.: (1) All questions are compulsory. | |
|----------|--|-----|
| | (2) Make <u>suitable assumptions</u> wherever necessary and <u>state the assumptions</u> ma | |
| | (3) Answers to the same question must be written together. | ie. |
| | (4) Numbers to the <u>right</u> indicate <u>marks</u> . | • |
| | (5) Draw neet labeled diagrams wherever | |
| | (5) Draw <u>neat labeled diagrams</u> wherever <u>necessary</u> . | |
| | (6) Use of Non-programmable calculators is allowed. | |
| 1. | Attempt any three of the following | |
| a. | Attempt any three of the following: Explain the working of Coal based and the them. | 15 |
| b. | Explain the working of Goal based agent with diagram. | |
| c. | What is Artificial intelligence? Explain with example. | |
| d. | What is the purpose of Turing test? Explain PEAS description for twill and | |
| e. | Explain PEAS description for taxi's task environment. | |
| f. | Explain any five properties of task environments. | |
| 1. | Write a short note on foundation of Artificial intelligence. | |
| 2. | Attempt and there of the C. H | |
| a. | Attempt any three of the following: | 15 |
| b. | Explain depth first search algorithm with suitable example. | |
| | Explain Hill climbing algorithm in detail. | 3 |
| c. d. | Explain 8-queen problem using the concept of genetic algorithm. | - |
| | Formulate Vacuum world problem. | |
| e. f. | Explain how algorithm's performance can be evaluated. | |
| | Differentiate between informed Search and uninformed search with suitable example. | |
| 3. | Attempt any three of the following: | |
| a. | Explain min-max algorithm with suitable example. | 15 |
| b. | Write a note on card games. | |
| C. | What is meant by conjuctive normal form? Explain. | |
| d. | Explain simple knowledge-based agent. | |
| | Explain wumpus world environment giving its PEAS description. | |
| e. f. | Explain resolution theorem with suitable example. | |
| ٠, | Explain resolution deolem with suitable example, | |
| 4. | Attempt any three of the following: | 15 |
| a. | What is first order logic? Discuss basic elements of first order logic. | 15 |
| b | Explain the process of knowledge engineering. | |
| C | Explain following w.r.t. First Order Logic. 1. Term 2. Atomic Sentences 3. Complex Sentences | |
| Ÿ. | 4. Universal Quantifiers. 5. Existential quantification. | |
| d | Explain how A.I is useful in Electronic Circuits Domain. | |
| e 🥏 | "The law says that it is a crime for an American to sell weapons to hostile nations. The | |
| | country Nono, an enemy of America, has some missiles, and all of its missiles were sold to | |
| | it by Colonel West, who is American". | |
| , G. | Formulate this knowledge in First order logic. | |
| f | Explain in brief about unification algorithm. | |
| | 2. Property of the control of the co | |
| 5. | Attempt any three of the following: | 15 |
| a. | What are events? Explain its importance. | 10 |
| b. | Write Planning Domain Definition Language (PDDL) description of an Block worlds, | |
| c. | Explain planning graph in detail. | |
| d. | Explain Forward (progression) state-space search algorithm. | |
| e. | Explain semantic network with example. | |
| f. | Explain Internet shopping research agent in detail | |
